BLAULITE HRV 8 EC

Heat recovery ventilators with EC motor for commercial applications

Casing

- Steel casing is covered with high quality multilayer aluminium and zinc alloy to prevent corrosion. The casing is equipped with a switch to turn the ventilator off when the service panel is opened. Service access from both left and right side. For outdoor installation the roof is necessary (optional).

Heat recovery core

- Unique plate heat exchanger is made of polystyrene and designed for high-efficient heat recovery. The stainless steel drain pan is located on the inlet and outlet sides.

Fans

- The unit is equipped with supply and exhaust centrifugal fans featuring backward-curved blades and advanced EC (Electronically Commutated) motor technology. These fans deliver superior energy efficiency and precise speed control. They come with built-in thermal overheating protection and an automatic restart function, ensuring consistent and reliable performance. Additionally, both the electric motors and impellers are dynamically balanced to minimise noise and vibration, providing smooth and efficient

Defrost system

- Fan stop defrost system is activated when the outdoor temperature falls below 23 °F (-5 °C).

Filter

- Washable MERV 6 air filters in exhaust and supply air streams.
- Filters MERV 8, MERV 13 optional.

MERV 13	0.25	0.5	0.67

Control

- The unit incorporates an integrated automation and control system with following functions:
  - Operation mode switch.
  - Air flow balancing by supply and exhaust fan independent speed adjustment.
  - Automatic recovery core frost protection.
  - External control device connection.
